

## “Making Europe Work”

Civic Academy for young disseminators from France, Germany and the Western Balkans

30.04. – 05.05.2019

with kind support of

ASKO EUROPA STIFTUNG

### About the Civic Academy

The project „Making Europe work“ brings together young motivated Europeans and their organizations from the Western Balkans, France and Germany and focuses on ways to enhance civil society cooperation in and between these regions.

Which challenges do politics and societies face in the light of recent developments in Europe? What are the options for the future cooperation between EU Member States and non-EU countries? What is the role of the young generation and what are its possibilities for action in these fields? The Franco-German motor and the Western Balkans, a European region of crisis and opportunity, are of central importance in this context.

*A follow-up seminar in Tirana (Albania) is planned.*
